LearningPoint365 has been designed to work with Microsoft Office 365, delivering all the benefits and features of a modern Learning Management System (LMS) within a business’s existing Office 365 ecosystem. LearningPoint365 works inside SharePoint online, an integral part of the Office 365 suite, which makes the software ideal for businesses looking to maximise the return on their investment from Office 365 and reduce the number of systems they use.

LearningPoint365 fits neatly alongside our PeoplePoint365 SharePoint HR management system, or independently, as an effective way to engage users, automate the learning process, measure progress and manage competencies.

LearningPoint365 has been designed to be Shareable Content Object Reference Model (SCORM) compliant. SCORM is an industry standard regarding the packaging and sharing of online learning course material. A SCORM compliant LMS ensures courses and the system can communicate without any challenges.

LearningPoint365 can enable learning & HR leaders to take an integrated, digital approach to managing employee life-cycle and focus their time on what really counts by providing data to support and underpin business goals.
A Simple Approach

Software as a Service (SaaS)

LearningPoint365 can be accessed on a subscription basis to provide a lower entry point and to mirror the pay per user model that’s familiar to Office 365.

Single Platform Solution

LearningPoint365 allows businesses to reduce the number of disparate system and solidify the IT, HR admin and end user experience by utilising the Office 365 eco-system.

Best-of-Breed

PointSolutions aren’t resellers, we have built our solutions in-house, using native SharePoint functionality and so we are able to provide expert support without it costing the earth.

A Few System Highlights

- Mobile functionality to increase adoption and engagement rates and empower managers
- Personalisation to improve engagement, promote a positive user experience and provide a learning path
- Training course search and booking feature
- SCORM compliance so courses and the system can communicate with each other and avoid interoperability challenges
- Real-time measurement, reporting, and performance tracking linked to company goals
- Language translation settings specific to user location
- Auto enrolment and role-base assignment
- Quiz Builder and live knowledge feedback questionnaires

Software Assurance

As your business grows and the software market evolves, Software Assurance provides access to regular app updates, meaning that you will always have the best possible system. Enhancements aren’t restricted to performance and usability but are more focused on new and improved functionality, which helps to ensure your system is always ahead of the game.

Support Credits Option

PointSolutions offer a number of credit based support packages, to help businesses maximise and extend the SharePoint environment. Our packages allow you to call off credits/time to contribute towards enhancing the systems we have helped you deploy.

Say it with Badges

As your employees complete the various stages of their learning journey, you can reward them with badges that they can wear with pride on their personal learning dashboard. A great visual reminder that their hard work and achievements count.

We’ve been very impressed with the team at PointSolutions and the very high level of service that they provided during our implementation and go-live.
